

How does it work?

The pharmacy will attach a small electronic tag to your prescription container. It has the same info as the printed label. Place the medication on the ScripTalk Station Reader and hear the label spoken aloud. You can also download the free App for iPhone or Android.

What does it cost?

As part of En-Vision America's **Pharmacy Freedom Program**, the ScripTalk Station Reader is supplied on loan to patients at no cost. This is a **FREE** program.

How do I get talking labels?
